## **Terms of Use**

The terms of use for this study can be found at:  
<http://www.icpsr.umich.edu/icpsrweb/ICPSR/studies/36167/terms>

## **Information about Copyrighted Content**

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

**NOTICE**  
**WARNING CONCERNING COPYRIGHT RESTRICTIONS**

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

## **ICPSR PROCESSING NOTE FOR # 36167**

*National Politics Study (NPS), 2008*

***Public use data***

### **1) Confidentiality:**

- In the public use data, ICPSR has blanked the all responses that contain respondent names and other identifiable characteristics to protect respondent confidentiality.
- These responses are shown in the data as "BLANKED FOR CONFIDENTIALITY - ICPSR".
- Values that were deemed as indirect identifiers (such as birth year, age, and income) used a series of data coarsening techniques to protect for confidentiality. More specifically, birth year, age, and income were top-coded.
- For access to the restricted use data, the user must sign the ICPSR Restricted Data Use Agreement.

### **2) Question Text:**

- Question text was added to the data based on the original data collection instrument deposited by the Principal Investigator.

### **3) Value labels:**

- Value labels were standardized based on the original data collection instrument deposited by the Principal Investigator.
- Any spelling errors found in the value labels were corrected during ICPSR processing.

### **4) Missing Values:**

- Missing values were standardized as per the study's convention.

### **5) Variable Rename:**

- The following variables were renamed to improve the usability of the data:

**Variable Description and Frequencies**

**Note:** Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
